

Assignment 3.3 – Ideal vs. Non-Ideal Testing Pyramids

Instructions

Write a one-page summary analysis of your findings on “Ideal vs. Non-Ideal Testing Pyramids.”

The essay must be substantive, contain at least two (2) secondary sources (scholarly journals, published books, etc.), and written in APA format.

There should be an introduction, a conclusion, and a developed body (generally at least a few paragraphs – at least 500 words). Points will be deducted for not meeting the specified word count requirements. Reference lists and in-text citations do not count toward the word count requirements.
